

Symposium on Law &
Economics of IP
Feb. 18, 2008

Open Source:

From Anecdote to Policy Instrument

Stephen M. Maurer
smaurer@berkeley.edu

Introduction

A New Innovation Incentive

Grants

Prizes

Contract Research

Patents

⋮

Open Source

How Well Does Open Source Generalize?

Beyond UNIX?

Beyond Software?

Folklore, Farming, Academic Science, Machine
Tools, GIS...

Demonstrating Generality: Drug Discovery

2000 Answer: Optimistic (and Wrong)

2005 Answer: Gloomy (and Wrong)

Big Pharma

New Therapies ↓ ↑ Money

Patients

Standard Objections

“Innovators Must Recover Their Costs”

“Open Source and Patent Incentives Can’t Coexist”

Wes Cohen, *Does Open Source Have Legs?* in INTELLECTUAL PROPERTY RIGHTS IN FRONTIER INDUSTRIES, (R. Hahn, ed., 2005).

Software
Makers

New
Code

Money

Users

Response:

The Argument Proves
Too Much...

- Not all software (drug discovery) is commercial.
- Software (drug discovery) is not monolithic.

Drug Discovery is Not Monolithic...

Basic Research	How Disease Works
Finding Targets Validating Targets	Points of Intervention
Finding Lead Compounds Optimizing Lead Compounds	Finding Drugs
Process Development	Learning to Make Drugs
Pre-Clinical Testing Phase I Tests Phase II Tests Phase III Tests Approval Phase IV Tests	Testing

Introduction

The 2008 Answer – Optimistic (and Right)?
From Anecdote to Understanding
A Rich Literature
Why OS Works - Incentives
When OS Can Improve Welfare

Stephen M. Maurer and Suzanne Scotchmer, *Open Source Software: The New Intellectual Property Paradigm*, in *Handbooks in Information Systems*, Vol. 1 (T. Hendershott, ed., 2006)

Introduction

This Talk

How Simply Can We Tell The OS Story?

Test #1: Do We Understand Current Examples?

Test #2: Can We *Engineer* New Ones?

*The Big Picture:
How Simply Can We Tell This Story?*

Big Picture Lessons

Incentives

Own Use*

Education

Signaling*

Complementary Products*

Social Psychology

* Incentive Applies to Individuals *and* Firms.

Big Picture Lessons

Welfare*

Access

Under- and Over-Provision

Better Information & Transparency

Reusing Code, Rewarding Productive Workers,
Identifying User Needs, *etc.*, *etc.*

*Compared to IP.

Examples

Own Use

Classical Open Source
Users Know Best
Niche Markets

No (Ethical) Drug Discovery Analog..

Own Use Individuals

Apache

User Innovation

LINUX

Denying Network Effects to Others

“Informants spoke of their contributions as investments in their future tools: They are creating code that they will never have to pay someone to use again.”

S. O'Mahoney, “Guarding the Commons: How Community Managed Software Projects Protect Their Work,” *Research Policy* 32:1179 (2003)

Own Use - Companies

Own Use -
Companies

Drug Discovery Analogs?

1. Cambia/BioForge

GE Plants

Protected Commons: Open Source or Patent Pool?

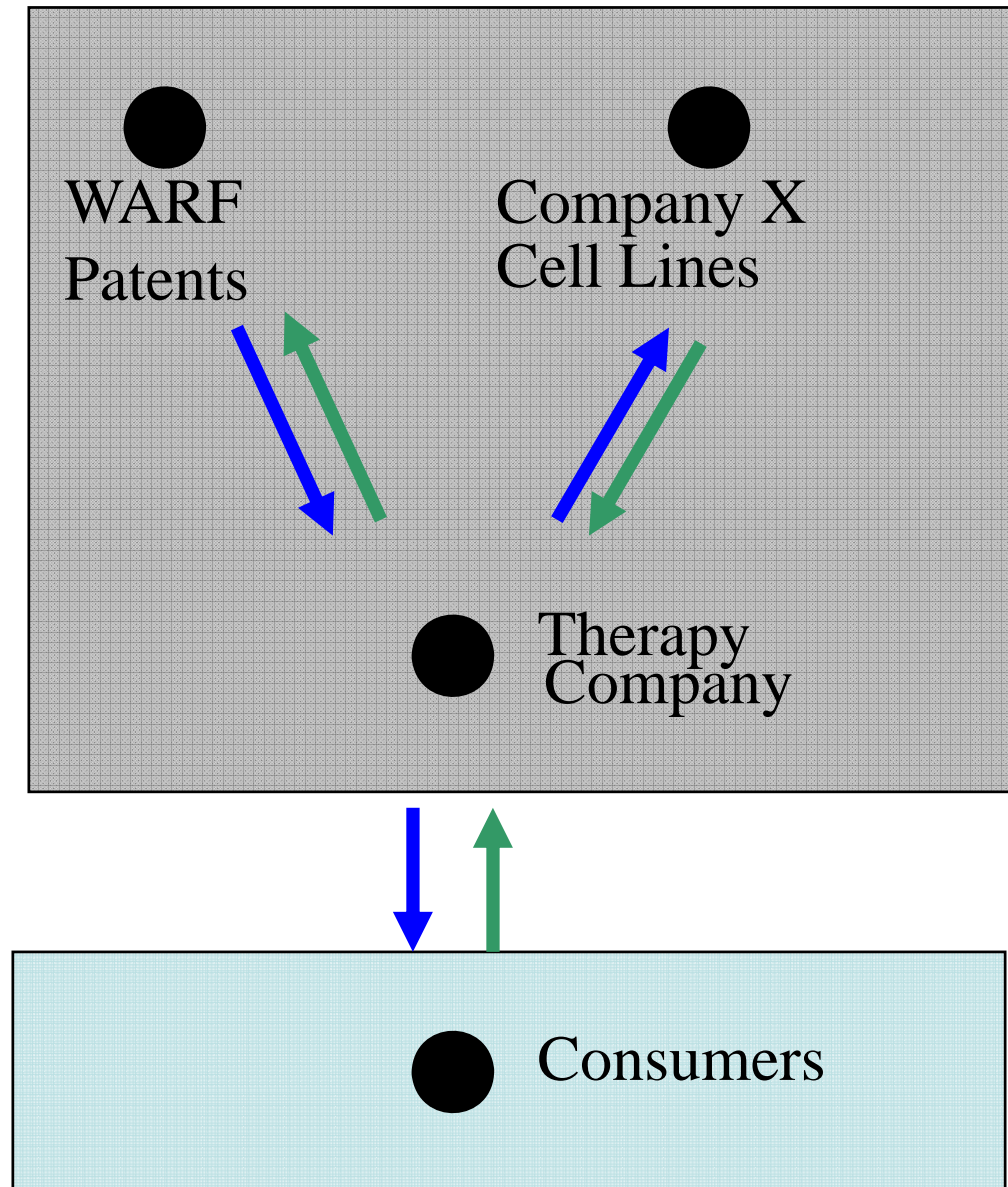

“Miniscule” Participation.

Richard Jefferson, Science as
Social Enterprise: The CAMBIA
BiOS Initiative, *Innovations* 1:11
(2006).

Own Use -
Companies

2. Stem Cells

Industry Structure

A. A. Cournot, *Researches into the Mathematical Principles of the Theory of Wealth* (1838).

FAQs for Requesting Stem Cells

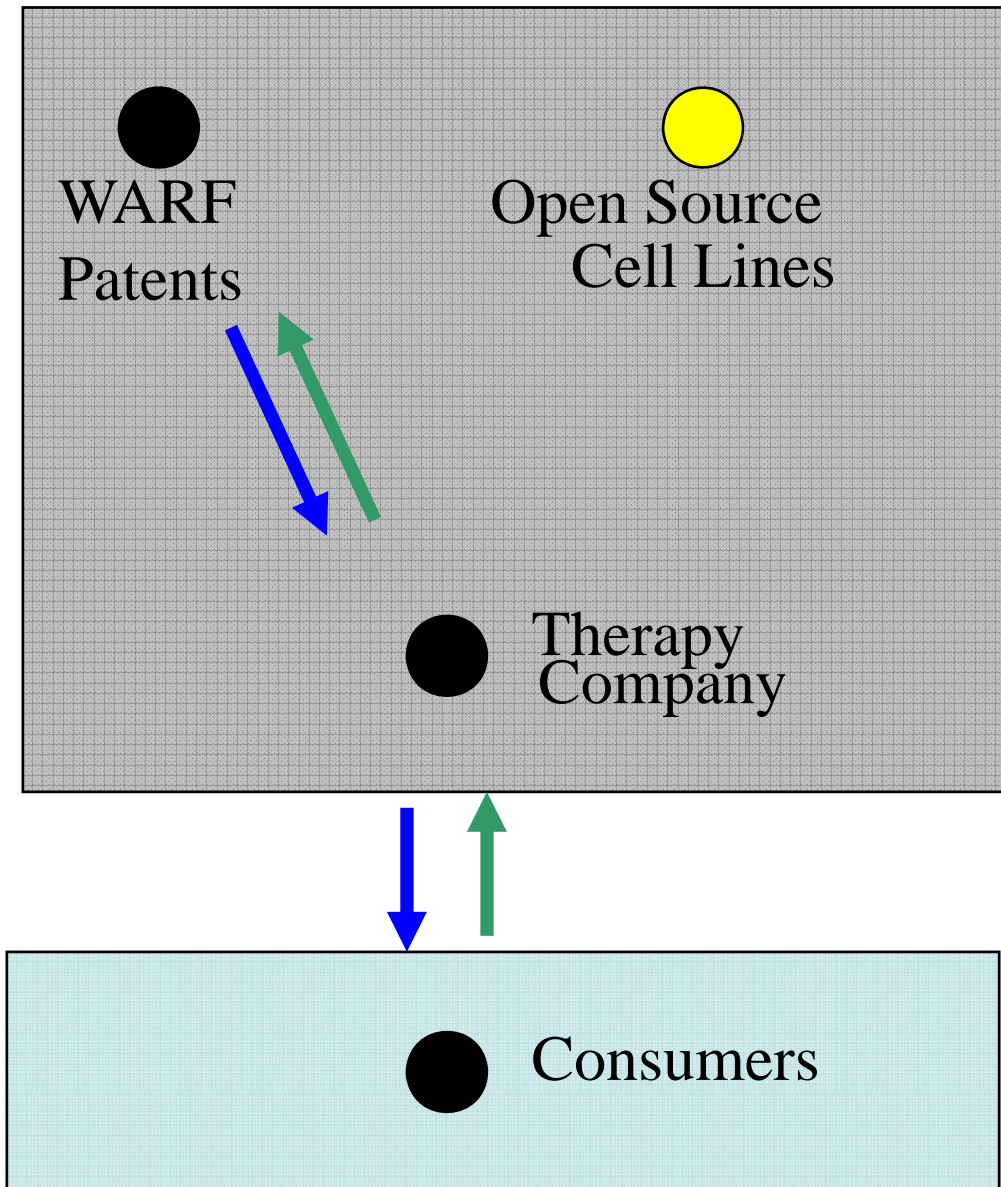

5. Which cell lines should I order?

We get many inquiries for advice as to which lines should be ordered. We suggest that you do some reading of the literature in your field of study to help identify the cell lines used in that research. However, even that groundwork may not lead to a specific recommendation. For example, at WiCell's and Dr. Thomson's UW research laboratories, H1 and H9 have been used more frequently than H7, H13, and H14; therefore, we have more experience with H1 and H9. Even so, we have no evidence that these two lines are "better."

Own Use - Companies

The business case
for open cell lines.

Welfare effects

Education & Signaling

Education & Signaling

Education

Signaling - Individuals

Pre-History: Plato & Socrates

Apache

Signaling by Firms

Embedded LINUX

Joachim Henkel, "Selective Revealing in Open Innovation Processes: The Case of Embedded Linux," *35 Research Policy* 953 (2006).

Roberts *et al.*, "Understanding the Motivations, Participation, and Performance of Open Source Software Developers: A Longitudinal Study of the Apache Projects," *Management Science* 52(7): 984-999 (2006).

Drug Discovery Analogs

1. Tropical Disease Initiative

On-Line *In Silico* Drug Discovery.

Validate targets, predict lead compounds.

Education and signaling.

Stephen M. Maurer, Arti Kaur Rai & Andrej Sali, *Finding Cures for Tropical Diseases: Is Open Source An Answer?* 1 Public Library of Science: Medicine 56 (2004)

The Synaptic Leap www.synapticleap.org

Would TDI Be Useful?

Under/Over-Provision

The *Value* of Ignoring Price Signals

Access

Development rights & increased competition

Manufacturing

Transparency

Pooling Information.

Documenting the best candidates.

Generating New Science?

1b. Open Source Chemistry

Mat Todd's Schistosomiasis Project.
Some Chemistry Costs Are Modest!

T. Kepler *et al.*, "Open Source
Research – The Power of Us,"
Australian J. Chem. 59:291 (2006).

2. Clinical Trials

The Problem With Commercial Trials

75% of Drug Costs!

Could Open Source Do Better?

Phase IV Trials

Treatment costs are already paid for...

Reputation, Education, Altruism

Phase I to III

Would FDA agree?

Harold J. DeMonaco, Ayer Ali & Eric Von Hippel, *The Major Role of Clinicians in the Discovery of Off-Label Drug Therapies*, (Working Paper 1995), available at <http://ssrn.com/abstract=780544>.

Complements

Complements

An Old Strategy

IBM in the 1950s

UNIX

IBM (Again)

Red Hat

redhat

No Drug Discovery Analogs (?)

Social Psychology

Most of the Above!

LINUX, TDI, OS Chemistry, *etc.*

Conclusion

Conclusion

Taking Open Source Seriously
